CAPABILITY STATEMENT

We're a Software Development Agency with decades of experience in software, web and mobile development based in California and Florida with R&D in Ukraine and Poland. Our team brings deep experience across healthcare, finance, real estate and media sectors. Our back-end to front-end developers leverage industry-leading technologies - including Java, Spring Boot, Hibernate, JavaScript, Angular, React, Dart, Flutter, etc. We focus on best-in-class results and guarantee both on-time and on- budget projects.

CORE COMPETENCIES

Web Application Development

- Custom Management Systems (CRM, CMS, RMS)
- Custom Admin Dashboards
- Web-based SaaS Platforms

Product & MVP Development

- Full-cycle product development from scratch (planning, design, development, testing, release)
- Web and mobile development with limited functionality and fixed budget

Solution and Cloud Architecture

- Building cloud infrastructure from scratch
- Migrating existing infrastructure to the Cloud (AWS, GCP, Azure)
- Environments, CI/CD pipeline, VPN Setup

Mobile App Development

- Hybrid Mobile Apps (iOS and Android)
- AppStore Connect and Google Play Console Setup
- Publishing and testing

API Development and Integration

- REST, GraphQL, SOAP API Development
- 3rd party API integration (OAuth Authentication, Payment Processing Integration, Analytics API integration)

Project Management & Testing

- Project management based on SCRUM and Kanban methodologies
- Business analysis, requirements, documentation, planning
- Manual and automation testing
